

# Project Name: Read Comics

## Team members:

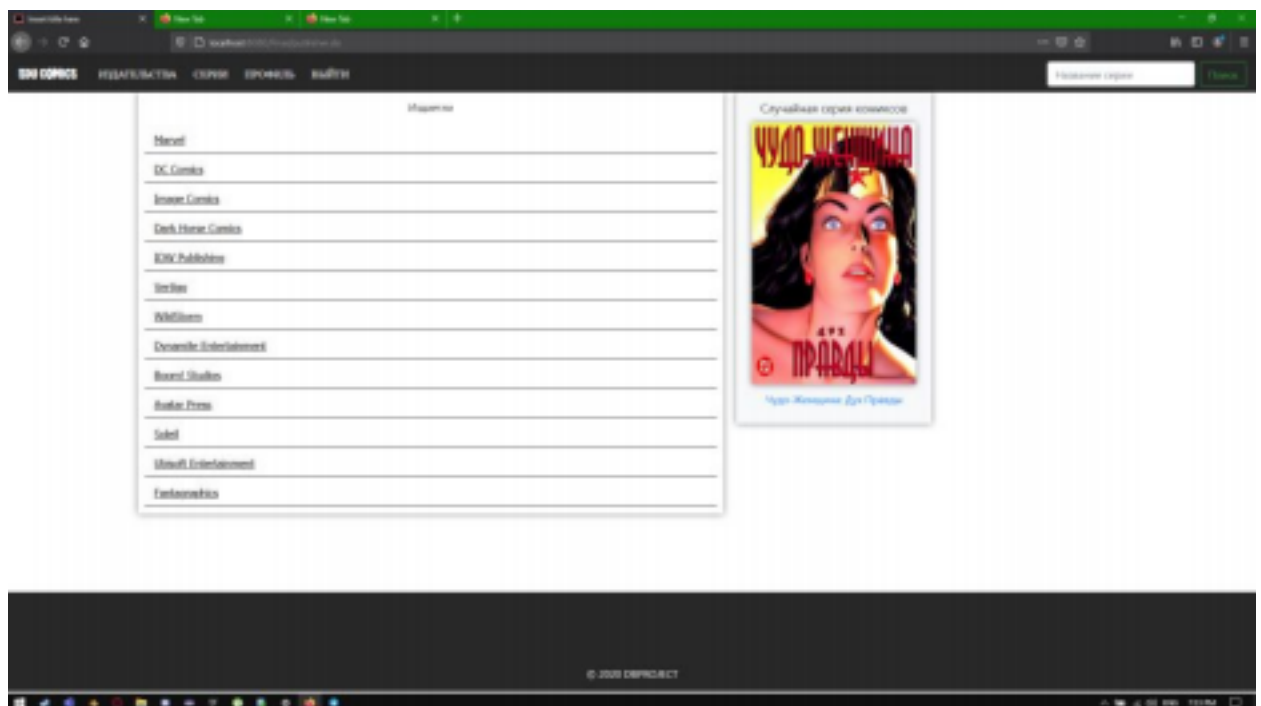

Akbergenov Nurbergen(180107286),  
Gylymmedden Yerkebulan(180107262),  
Abdirakhman Gafur(180107121).

## 1. General purpose of the project

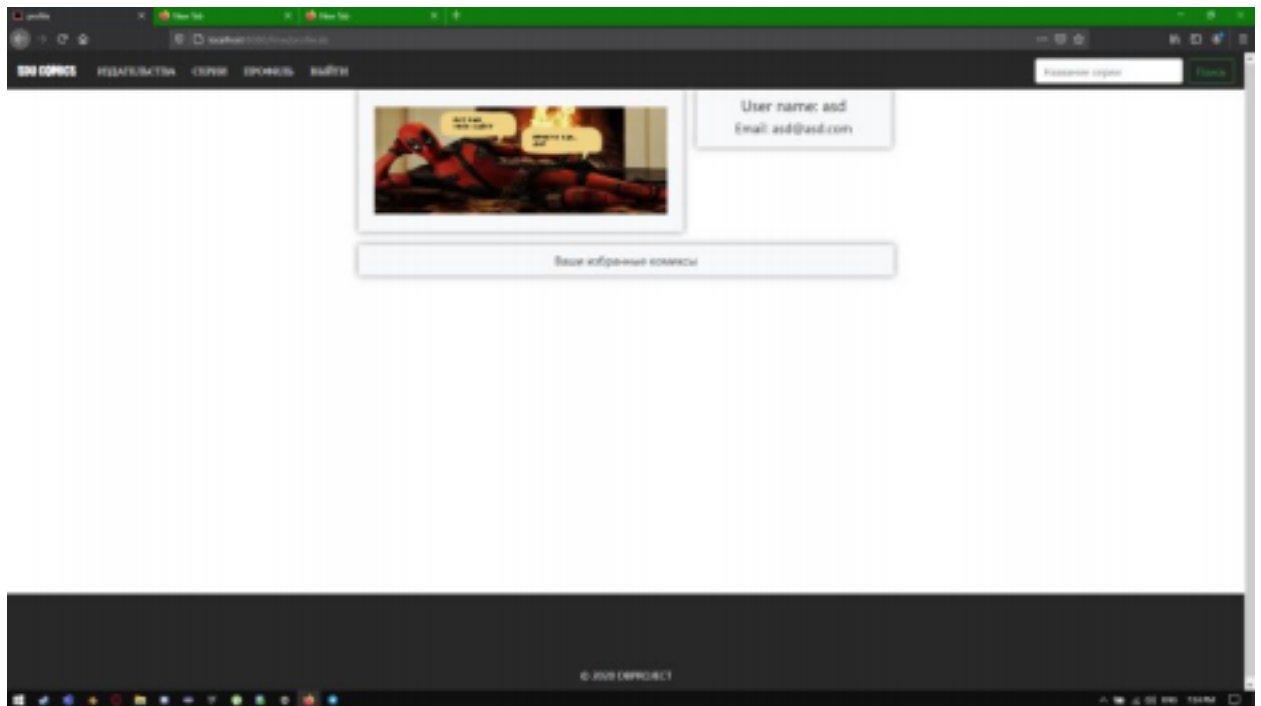

Our project was created for comic lovers. On this site you can read different comics for your taste. We created all the conditions so that the user was not bored and comfortable. And we also divided comics by genre and series. You can choose a suitable comic strip by genre. Also, you can search comics by Alphabet. If a user for the first time on the site needs to register. And then you can already enter by login and password.

### Main Page

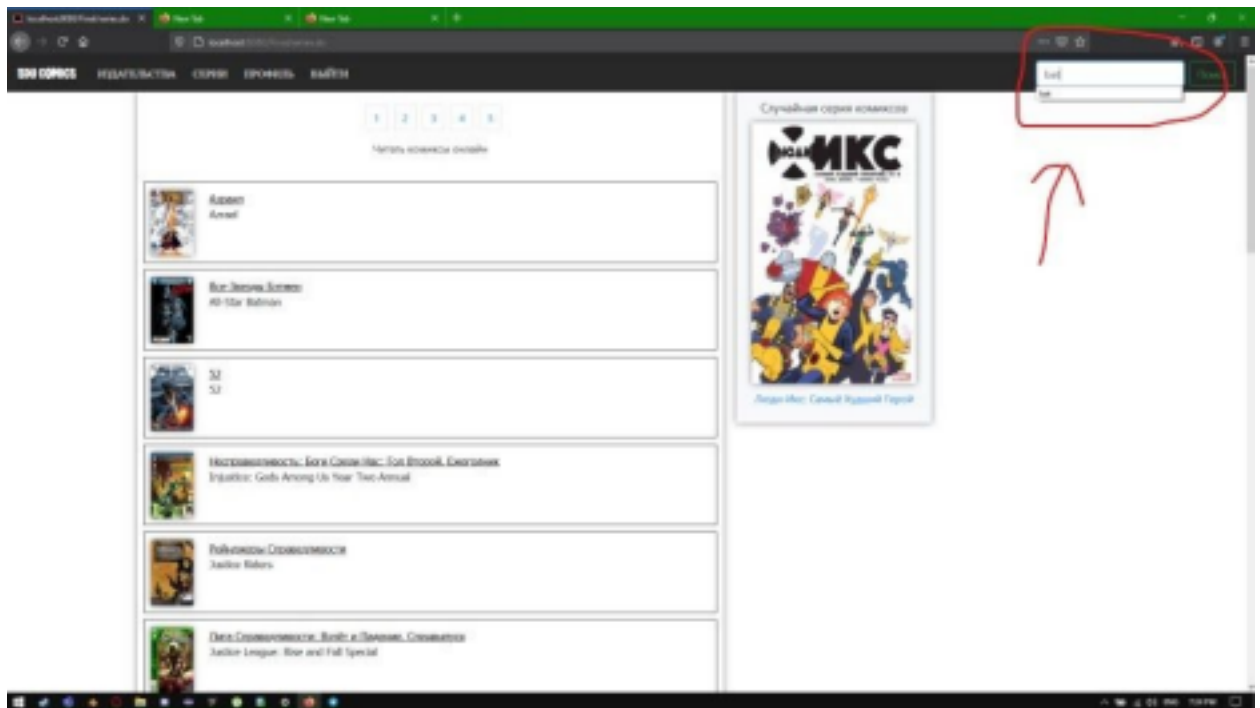

### Favourite comicses

Series Page

Searching by Name

### 3. Summary

In this Project, we have created a mini site with helping Oracle PL/SQL. It was a good experience for us in the field of PL/SQL database. Doing this project we went deeper with the data. For our project we parsed all the data. We did not use ready data. To parsing, we chose one site that can read comics.

### 4. Oracle features implemented in the project

We used all features that we passed in this semester. List of SQL requests that used for:

- Functions
- Procedures
- Cursors
- Collections
- Packages
- Triggers
- Dynamic SQL
